

## Company Policy

### Statement of Principles

#### **Policy regarding quality, environmental protection, safety and health in the workplace**

Quality, environmental protection and safe working place are integral components of all business processes. A high standard of quality, environmental protection and safety and health in working place is the aim of the top management and of all employees.

The company management recognizes without limitation the aspects of quality, environmental protection and occupational safety, and has set the following objectives with the integrated corporate policy:

- Keil Anlagenbau offers and delivers such products only that satisfy the requirements and fulfills the expectations of the customer or exceeds these.
- Keil Anlagenbau maintains a system that secures an efficient monitoring of the products and the effectiveness of failure prevention methods.
- Keil Anlagenbau has implemented a continuing improvement process for quality, environmental protection and occupational safety with corresponding tools including preventive measures and accident prevention. Accidents, occupational diseases due health risks as well as environmental and material damage should be avoided.
- Keil Anlagenbau develops its suppliers to satisfy the customers' requirements together with them.
- Keil Anlagenbau promotes a greater awareness for quality, environmental protection and occupational safety of all employees by means of regular information and training.
- Keil Anlagenbau integrates the quality concept, environmental protection, occupational safety and protection of health as early as during the planning stage of new equipment, activities, products and processes.
- Keil Anlagenbau analyzes, evaluates and monitors the environmental, safety and health protection aspects of the activities on-site and during installation work.
- Keil Anlagenbau provides programs to minimize the occupational health and safety risks, environmental impacts and the use of resources while improving the quality.
- Keil Anlagenbau is committed to continual improvement process with the established methods and procedures exceeding the compliance of standards and other requirements.
- Keil Anlagenbau maintains continuous and open communication with authorities, interested parties, the public, its business partners regarding environmental protection and occupational safety aspects.
- Keil Anlagenbau interacts with contractual partners to implement up-to-date environmental protection and occupational safety procedures as well as quality methods.
